Valley	8/6	8/6	8/5	8/5	7/4	7/4	7/3
Freezing Level*	1700m	1600m	1500m	1700m	1700m	1700m	1600m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Navigational difficulties will be the main hazard on Tuesday though the chill will be notable at height with the highest summits close to freezing.

Forecast for Wednesday 22 Feb 2023

Weather: Some heavier rain in the early hours this turning to snow down to about 700m towards daybreak. Further showery rain and hill snow in the morning then becoming brighter with sunny intervals and a few showers in the afternoon these of snow down to around 600m.

Maximum wind: In early hours south to south-westerly 30 gusts 40mph becoming north to northwest 20 gusts 30mph in the morning.

Chance of cloud-free hill tops above 800m: 10% early hours rising 20% during the morning and 70% in the afternoon.

Low Cloud and visibility: Cloud at 300-600m at first with occasionally poor visibility in rain and snow then cloud breaking and lifting 600m, with good visibility in the afternoon though falling moderate to poor temporarily in showers.

Temperature: **Valleys:** Plus 6 Celsius
At 800m: Plus 2 early hours then falling to zero in morning and minus 2 in the evening.
Freezing level: Above summits early hours falling 800m by dawn then 600m by evening.
